Hrutvik Nagrale (IIT2018088)

Vineet Kumar (IIT2018096)

Anshul Ahirwar (IIT2018099)

Ankit Kumar (IIT2018100)

We have created a website for car rental/dealing, the link to the website is given below:

<https://amazinghotwheelz.000webhostapp.com/>

We have also attached the source code of the website.

To open the website locally (without the need of internet) consider the following steps:

- To create a local host or local server, we recommend the use of Xampp. The link to download Xampp is given below:

[Download XAMPP](#)

- Install Xampp in the default location which is set to the C: drive of your PC with windows operating system and let the settings be default.
- Unzip the car rental file and temporary store it somewhere.
- Now put the carrental folder in the htdocs section of the Xampp installation location - **installation\_directory\xampp\htdocs\**
- In the case, if you have chosen default option in Windows operating system, the directory in which you must put the project file(car rental) is given by:
- **C:\xampp\htdocs**
- Similar is the case with any other operating system.

Now when all the prerequisites are taken care of. To open the website locally

- Run Xampp Control Panel as Administrator to avoid multiple permission requests.
- Start The following services
  - Apache
  - MySql
  - Filezilla
- Now open your browser.

- Type in the url search box “localhost/”.
- Xampp dashboard must pop up.
- Open phpmyadmin (select from the options given in the dashboard).
- Create Database named “carrental”
- Import database carrental.sql(available inside zip package)
- Open your browser Type “<http://localhost/carrental/files/index.php>” into your search box to access the **user** side module of the website
- Open your browser Type “<http://localhost/carrental/files/admin/index.php>” into the search box to access the **Admin** side module of the website.

### **Extra info for ppt presentation**

- Audio has been inserted into each slide of the ppt.
- To play the audio, run the presentation in slideshow mode and click on the icon provided beside each topic.
- The presenter’s roll number is specified on each slide.
